Automotive Sensors and Thermostats

Ranco North America has provided a wide array of thermostats and sensors for HVAC under-hood use since 1937. Most applications today use either electronic thermostats or sensors that come in a wide array of physical configurations. Ranco North America is QS-9000 certified.

APPLICATIONS

- HVAC compressor and clutch cycling.
- Condenser fan control.
- Evaporator freeze protection.

SPECIAL FEATURES

- Both electronic sensors and thermostats provide higher temperature sensing accuracy and are integral parts of today's computerized automotive systems.
- Sensors provide an economical way to sense temperature when sufficient ECM memory is available.
- Electronic thermostats can provide complete control when ECM memory is needed for other uses.
- Both fin and air sensing element styles are available.

- Ranco's electronic thermostats can switch loads ranging from ECM logic level currents to full clutch loads.
- Electronic thermostats are fully sealed for under-hood use and applications.
- Ranco is QS-9000 certified for all automotive thermostats and sensors.
- Ranco designs are EMI resistant.
- Many different packaging and termination options are available to meet a wide range of application needs. Contact Ranco North America marketing for further assistance.
