### About This Content

Conceived by the office of Sir William A. Stanier FRS, the Duchess is a classic example of British engineering at its finest. The first 10 locos of the class were built with a streamlined cladding colloquially referred to as an "upside down bathtub".

Due to the added weight and maintenance difficulties, the streamlining proved non-viable and it was later removed revealing a locomotive of very handsome lines. The remaining 28 locos were built without streamlining and the class became commonly known as "Duchesses". From 1945, smoke deflectors were fitted to help with smoke obscuring the crew's forward vision, giving them the distinctive final appearance that became so popular with observers.

The LMS Duchess pack is a high quality representation of the locomotives in LMS crimson and BR green liveries in unstreamlined guise. Scripted running numbers and nameplates provide 36 members of the class for your enjoyment. These painstakingly modeled locomotives make use of the latest sound, physics and smoke systems. A custom cab interior and clever additional features such as scripted couplers, hoses and configurable headcodes make these horses a satisfying addition to your Trainz collection.
